# **FORCEnet -** ***Engineering &*** ***Architecting*** ***The Navy's IT Future***

## **NMCI - Industry Symposium**

**19 Jun 2003**

**RADM Mike Sharp, USN**  
**Vice Commander**  
**Space & Naval Warfare Systems**  
**Command**

- **SPAWAR Review**
- **SeaPower 21 & FORCEnet**
- **FORCEnet and NMCI**

**One of the Navy's three major acquisition commands with 7,700 employees**

### **What we do...**

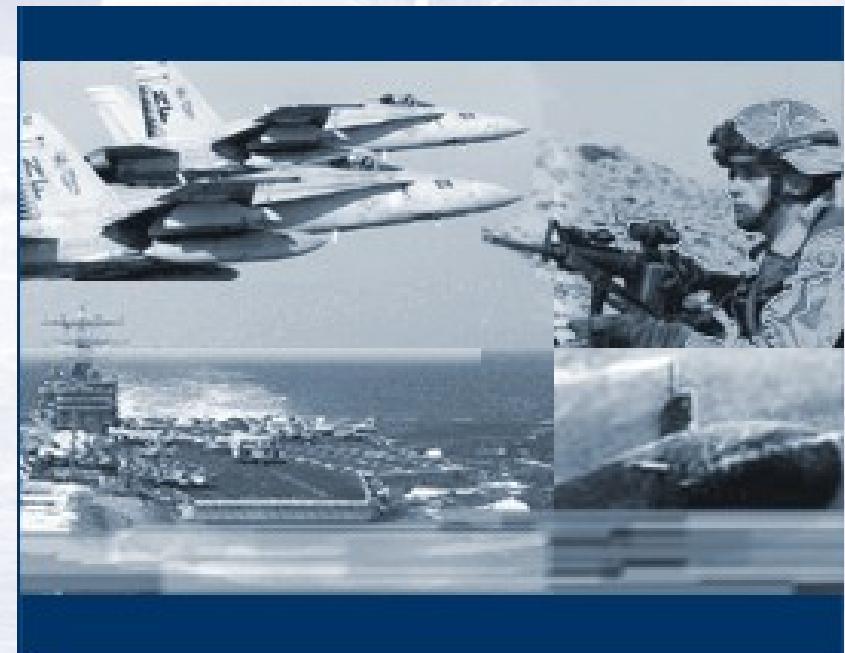

- **Partner with PEO- C4I & Space to deliver C4ISR capability to the joint warfighter**
- **Partner with PEO-IT & DNMCI**
- **Develop Navy, Joint and Coalition Interoperability**
- **Navy C4ISR Chief Engineer**
- **Navy FORCEnet Chief Architect/Assessor**
- **Combined TOA \$4.7 Billion**

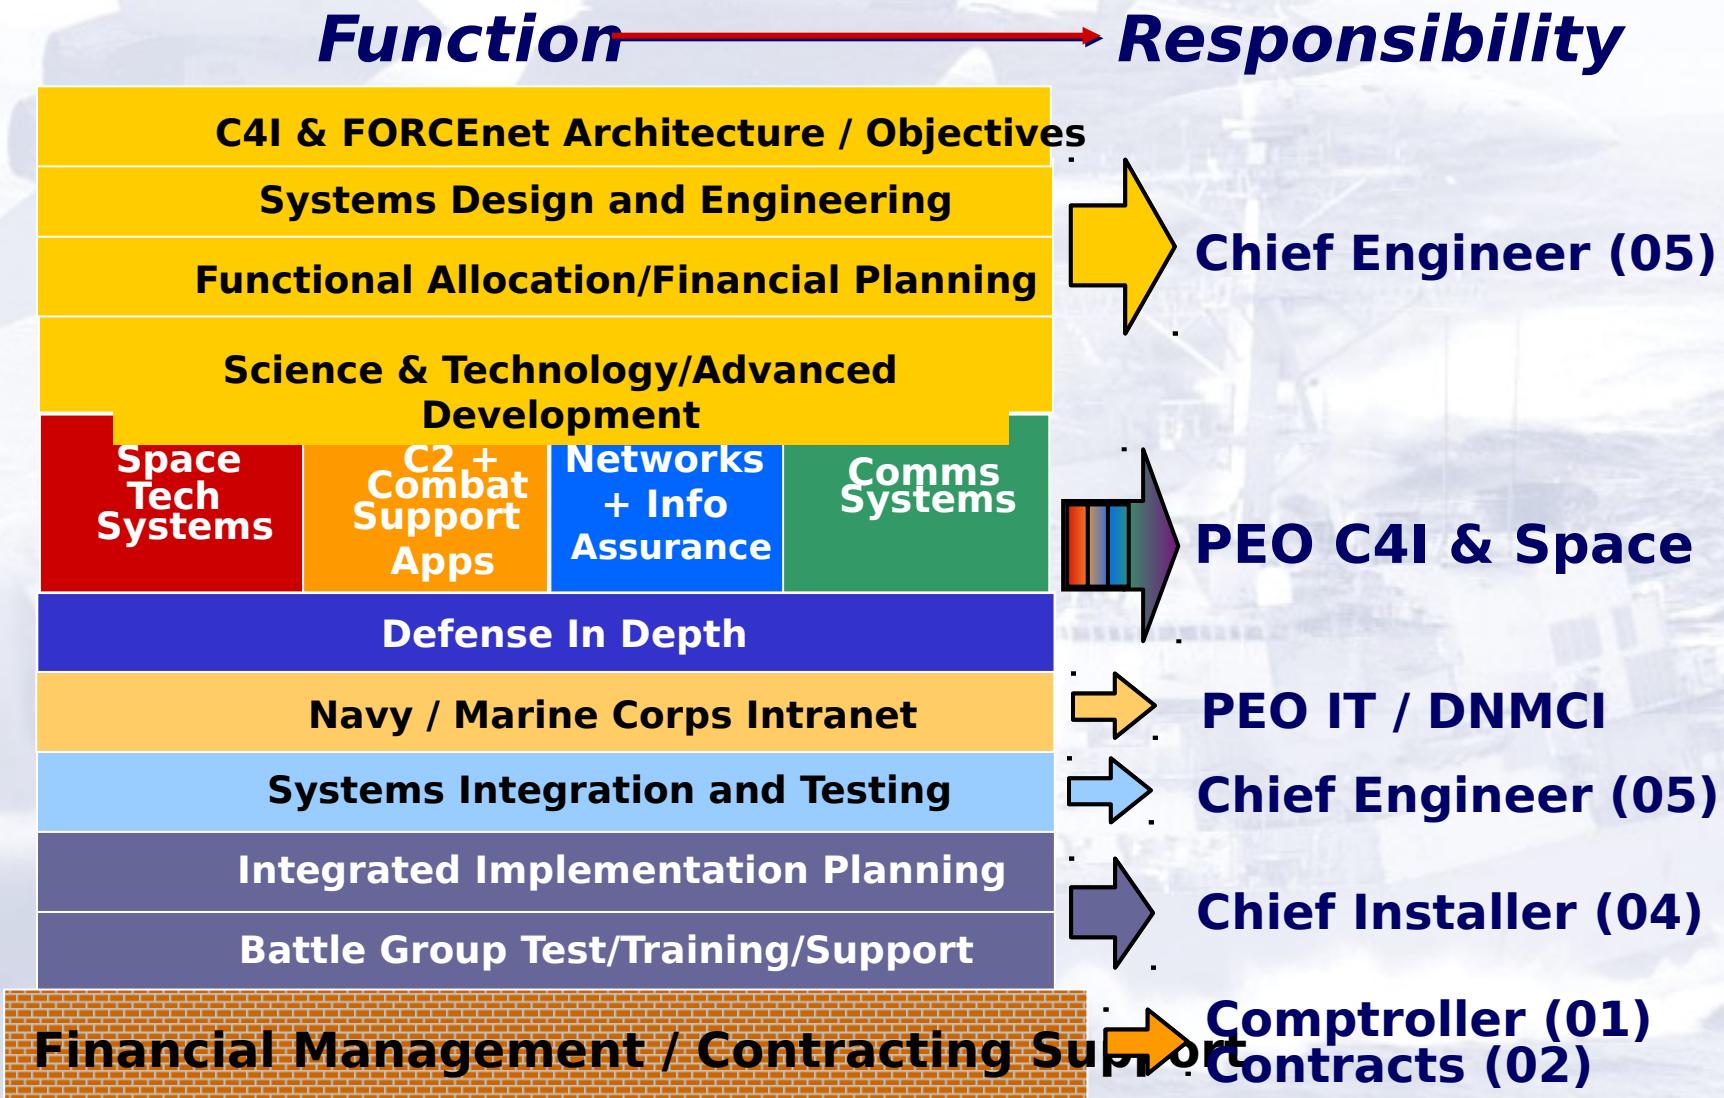

We deliver  
**FORCEnet**  
to the Joint Warfighter  
through the  
**DEVELOPMENT,**  
**ACQUISITION,**  
and  
**LIFE CYCLE SUPPORT**  
of effective, capable and  
integrated command,  
control communication,  
computer, intelligence,  
surveillance and  
reconnaissance, IT,  
and space systems.

# The Mission

# Functional Organization

# The Navy's Vision

## SEA POWER 21

Projecting Defensive Assurance  
assure allies, deter adversaries, sustain access

### Sea Shield

Innovation to the Warfighter...  
rapid prototyping,  
concept development,  
coordinated experimentation

Preparing the Warfighter...  
the right skills,  
in the right place,  
at the right time

Resources to the Warfighter...  
optimum resource allocation,  
increased productivity,  
enhanced procurement

Sea Trial

Sea Warrior

Sea Enterprise

FORCEnet

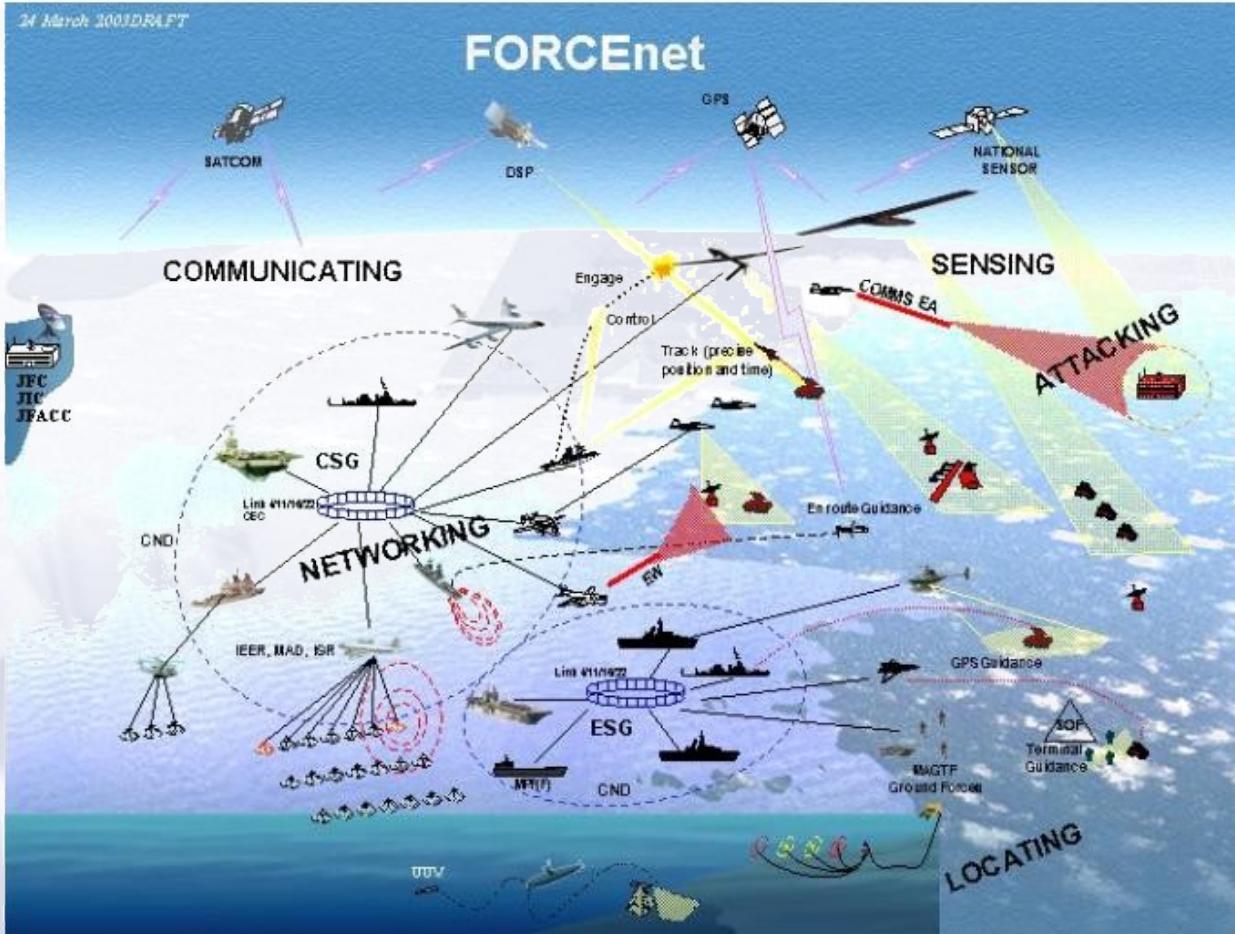

### Sea Strike

Projecting Offensive Power...  
responsive, precise, and persistent

### Sea Basing

Projecting Operational Independence...  
joint power from the sea

# FORCEnet Operational View

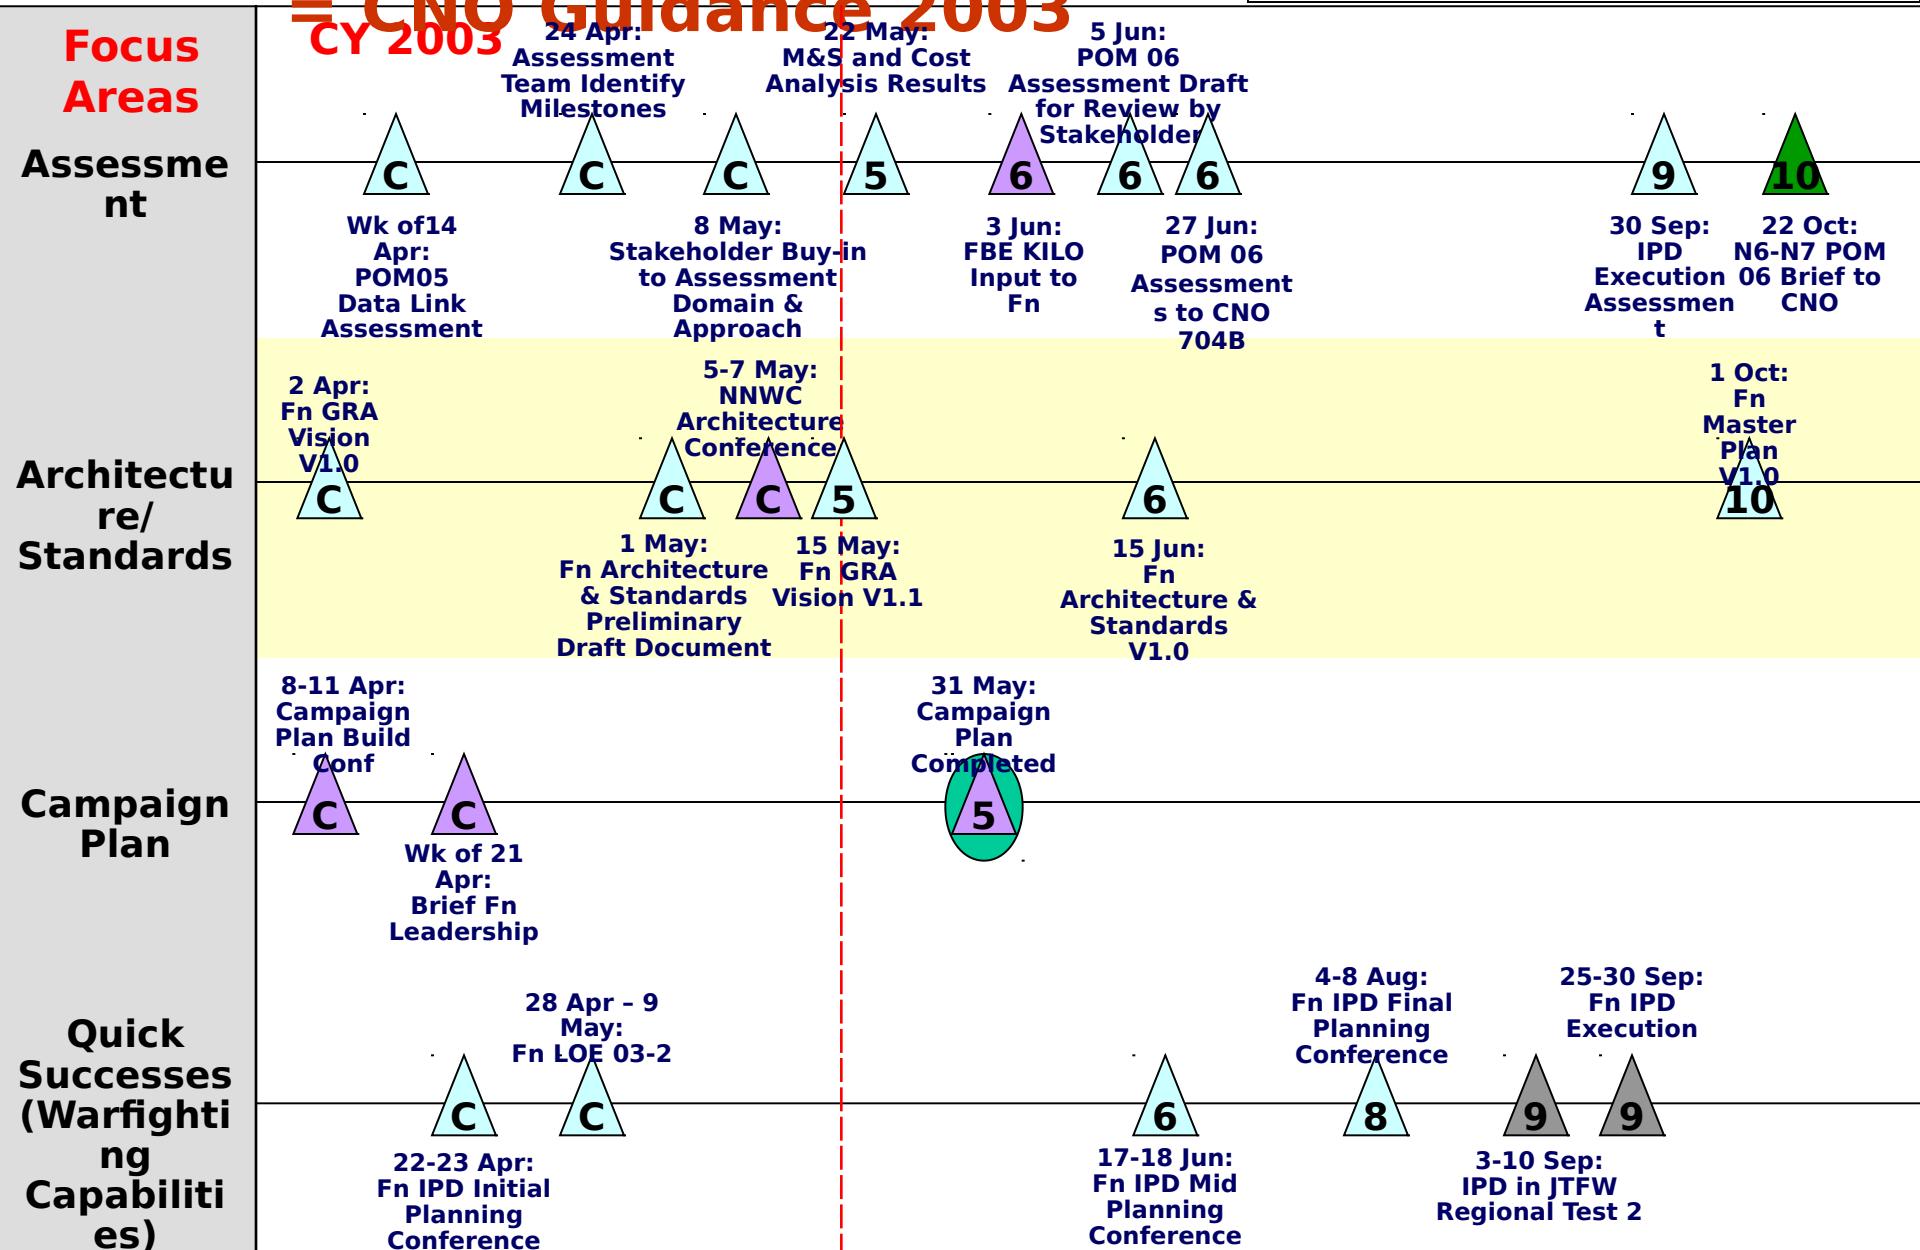

- **Sea Power 21 - "Naval"**
- **Joint from Inception**
  - **GIG-BE**
  - **TCA**
  - **NCES**
  - **JTR**
  - **Others**
- **Commercial Standards**
- **Spiral Development with Sea Trial**
- **Warrior Focused**

# FORCEnet Schedule

## CNO Guidance 2003

# Architectural Process

Govt. Ref. Arch. Vision  
Version 1.0 - 02 Apr 03  
Version 1.1 - 15 May 03

Architecture & Standards  
Version 1.0 - 1 May 03

**OPNAV & ASN(RDA)  
Review**

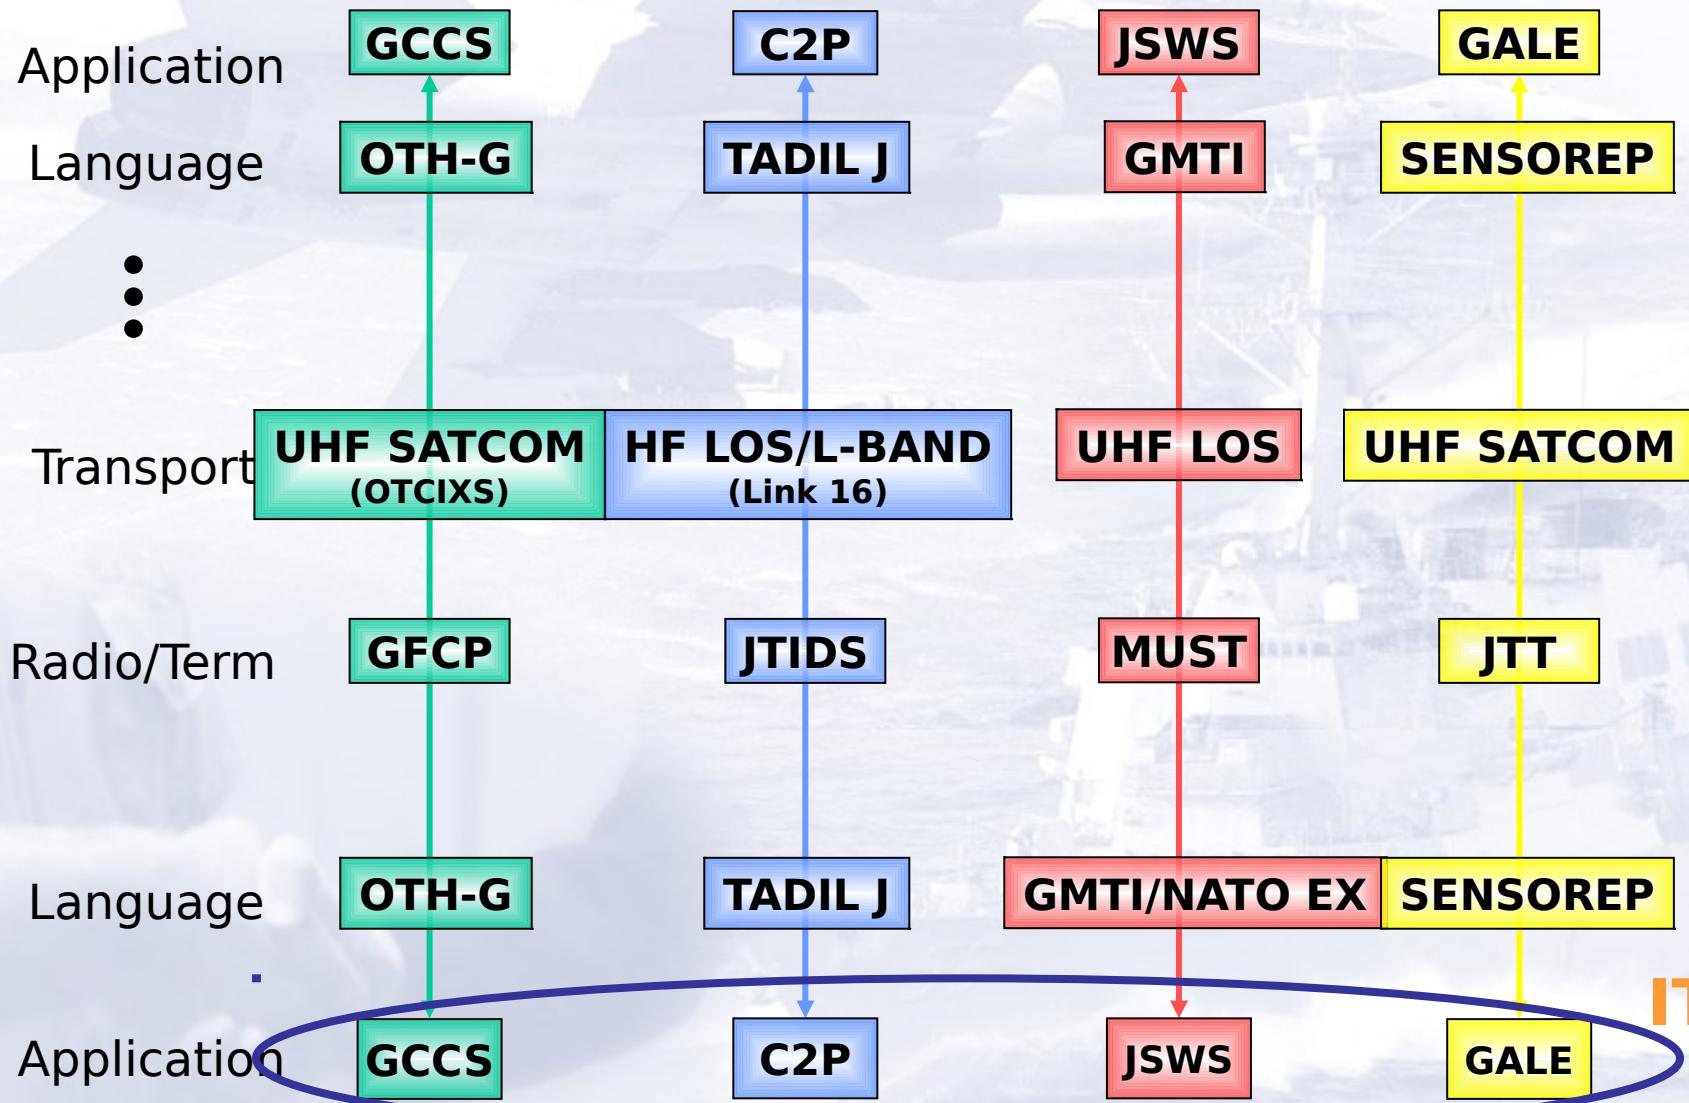

**Industry Review & Comment**

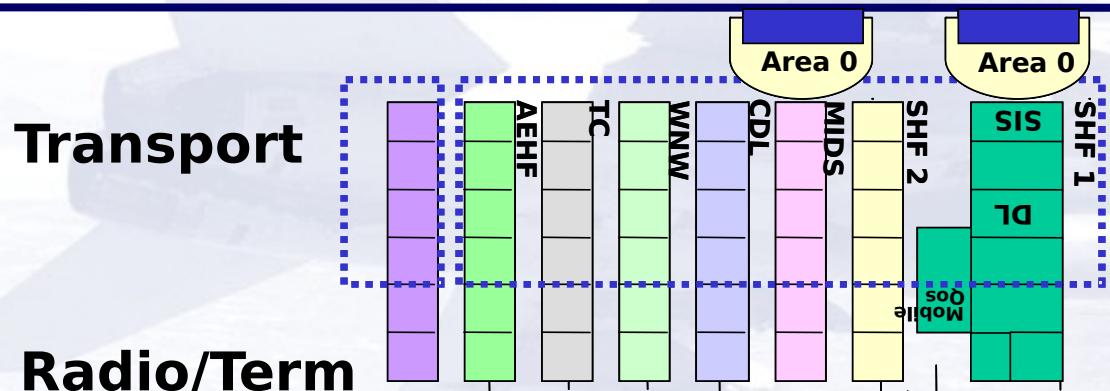

**Distributed Services  
IP- Based Network**

# Network Data Integration

# Network Data Integration

**Services, not Platforms**

**Separation of  
Interface from  
Implementation  
Protocol  
Neutral**

# Architectural Process

Govt. Ref. Arch. Vision  
Version 1.0 - 02 Apr 03  
Version 1.1 - 15 May 03

Architecture & Standards  
Version 1.0 - 1 May 03

**OPNAV &  
ASN(RDA)  
Review**

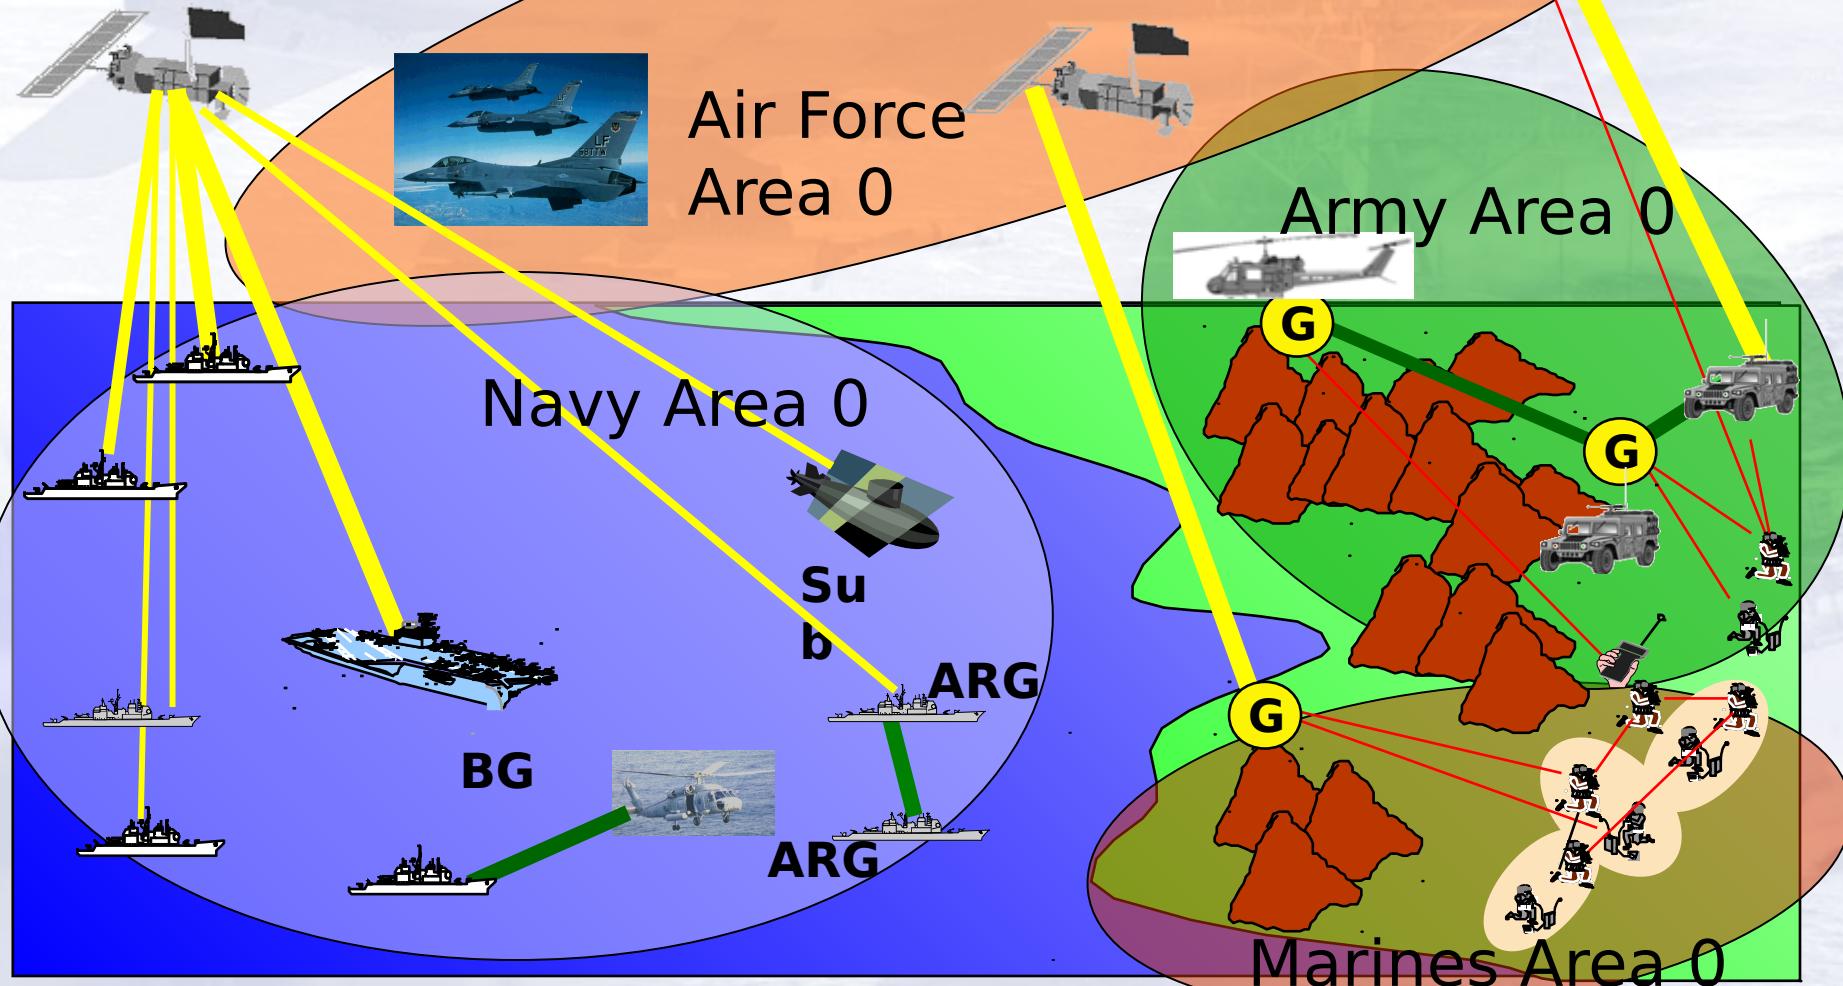

**Industry  
Review &  
Comment**

**Distributed  
Services  
IP- Based  
Network**

# JTF Connectivity Today: Based on Wireline Networking Principles

- Tier 3 - Mobile SATCOM / Microwave (Trunk Links)
- Tier 2 - Mobile LOS Network (Backbone Subnet Links)
- Tier 1 - Mobile Handheld (Subscriber Subnet Links)

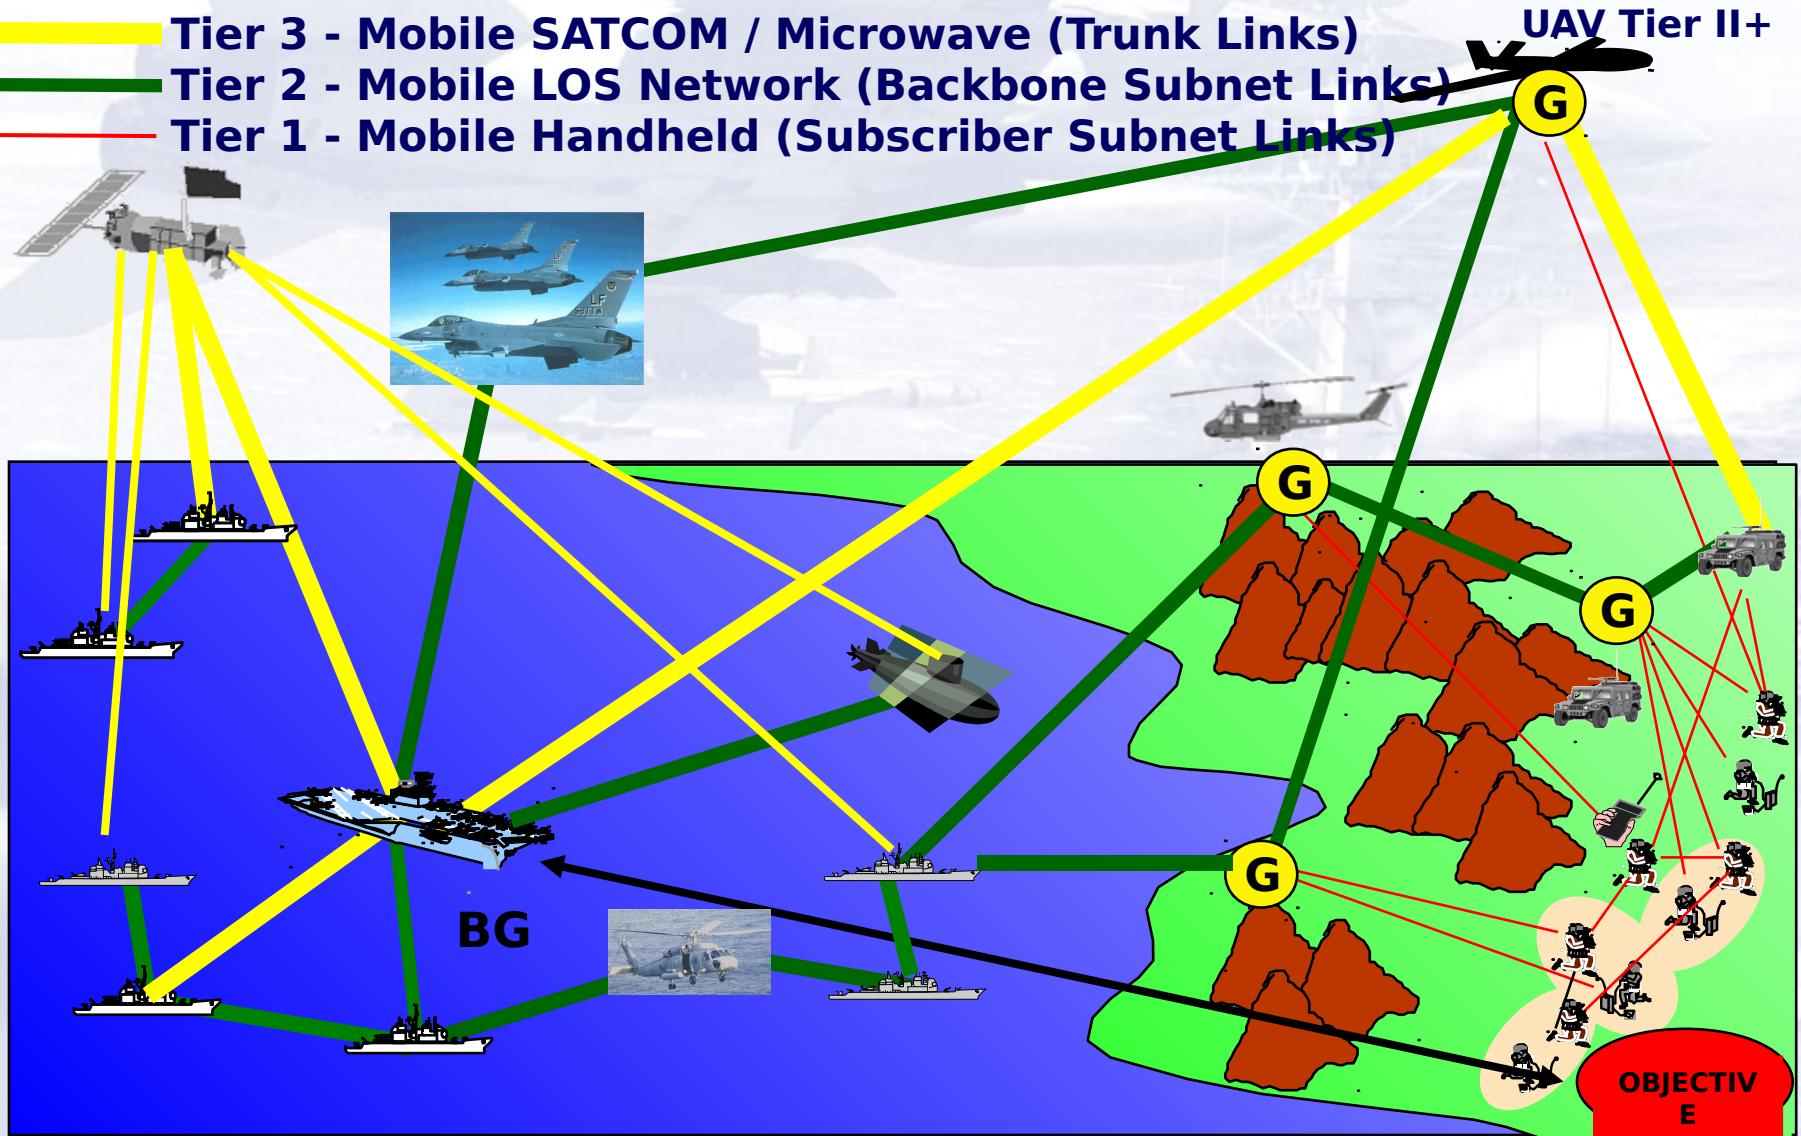

# This is the way we will fight, this is the communications capability we want!

**Tier 3 - Mobile SATCOM / Microwave (Trunk Links)**

**Tier 2 - Mobile LOS Network (Backbone Subnet Links)**

**Tier 1 - Mobile Handheld (Subscriber Subnet Links)**

# FORCEnet Challenges

---

- **Multi-Level Security**
- **Information Assurance**
- **IP Quality of Service**
- **IP for Mobile Users**
- **Leverage Experimentation & Pilots**
- **Explore large scale integration approach**

- **SPAWAR Review**
- **SeaPower 21 & FORCEnet**
- **FORCEnet and NMCI**

# Tying it together

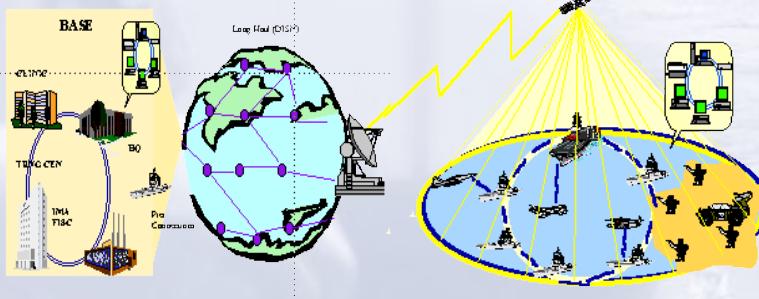

## Current Readiness

### INFRASTRUCTURE

NMCI

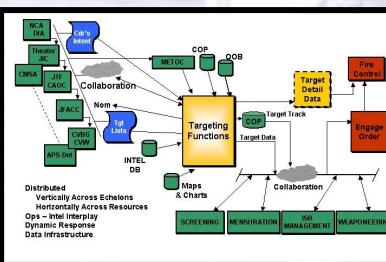

IT-21

HORIZONTAL INTEGRATION

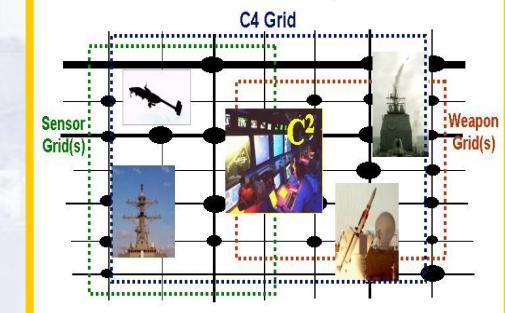

### DECISION MAKING

Information Fusion

## Future Readiness

**FORCEnet**  
**Superiorit**

***End-to-End Connectivity***

# NMCI will deliver to the Web-enabled Navy

# CNO's Philosophy

***"I want everyone here in industry to remember that Vern Clark said here today that we are never ever building another capability that doesn't fit into a FORCENet architecture for the future that ensures everybody is netted and connected. That is the future."***

Admiral Vern Clark  
Sea Air Space Exposition  
Washington, D.C.  
April 17, 2003
